PROFESSIONAL SUMMARY

Frontend Developer specialising in React, Next.js, and TypeScript, with working backend capability across Node, Express, and MongoDB. Led the frontend team on a Learning Management System at Trueminds Innovations, owning architecture and UI delivery across a 50+ intern cohort and closing the engagement with a 100/100 performance review. Independently designed and shipped six production web applications, including a job-matching platform with a skill gap analysis engine and a personal finance tracker with automated budget alerting. Eight years as a professional photographer and graphic designer, which shows up as disciplined typography, spacing, and visual hierarchy in every interface I build.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion, Headless UI, React Query

Backend: Node.js, Express, MongoDB, REST API design and integration, JWT authentication

Tools & Platforms: Git, GitHub, Vercel, Netlify, VS Code, Figma, Photoshop

Collaboration: Team leadership, code review, project coordination, cross-functional communication, UI/UX delivery

EXPERIENCE

Frontend Team Lead, Trueminds Innovations Ltd.

Feb 2025 – May 2025

- Led frontend delivery for TalentFlow, an internal Learning Management System serving a cohort of 50+ interns across multiple disciplines.
- Set up the frontend architecture and component structure, then guided the team in building against it to keep the product consistent and maintainable.
- Reviewed team contributions, coordinated a sub-team, and filled delivery gaps both inside the sub-team and across the wider project.
- Maintained a 5–6 hour update cadence that kept the team aligned and unblocked throughout the engagement.
- Acted as the most active contributor on UI/UX delivery, effectively serving as assistant project manager.
- Closed the engagement with a 100/100 performance review, scoring full marks in Technical Skill, Teamwork, and Workplace Attitude.

Web Developer, Freelance

2023 – Present

- Designed and delivered six production web applications end to end, from requirements through deployment, for university departments and individual clients.
- Translated UI designs into scalable, maintainable frontend systems using reusable component libraries.
- Built and integrated REST APIs with Node, Express, and MongoDB, including authentication and role-based access control.
- Tested and debugged across devices to ensure consistent responsive behaviour and performance.

PROJECTS

TalentFlow LMS: Trueminds Innovations · team-delta-lms.vercel.app

- Learning platform replacing scattered email, chat, and drive workflows with one system for course delivery, assignments, progress tracking, and peer collaboration.
- Led frontend architecture and coordinated UI delivery across the frontend team.

SkillBridge: Smart Job Portal · raw-smart-job-portal.vercel.app

- Recruitment platform that scores graduates against employer requirements and returns a compatibility rating rather than a pass or fail.
- Built a skill gap engine that separates missing technical and soft skills and returns targeted improvement suggestions.
- Implemented profiles, job posting, search, and applications with role-based access across three user types.

Smart Expense Tracker · smart-expense-client-ruby.vercel.app

- Personal finance application with per-category budgets tracked in real time and automated alerts firing at 50%, 80%, and 100% utilisation.
- Built the charting and progress layer that turns raw transaction lists into a readable spending pattern.

School Management System · school-management-app-sage-one.vercel.app

- Sole developer on a five-person team project, delivering authentication, course registration, a timed quiz engine, and performance tracking.
- Enforced assessment rules server-side: single active attempt, blocked retakes, backend timer, server-graded results, so they cannot be bypassed from the browser.
- Prevented duplicate course registrations at the database level and gated every route with JWT authentication.

EDUCATION

B.Sc. Computer Science: Nnamdi Azikiwe University

2021 – 2026

WASSCE: Comprehensive Secondary School, Nawfia

2009 – 2015

ADDITIONAL INFORMATION

- Eight years as a professional photographer and retoucher, covering projects across FCT, Lagos, Delta, and Anambra.
- Design-literate developer: I build what I design, rather than handing off between the two.
- Open to frontend and junior full-stack roles, remote contracts, and agency work.
